

Efficient- Optimise – Save Energy - Cool Down

**HVLS FANS
FOR
CAR DEALERS**

ADVANTAGES and BENEFITS

ADVANTAGES:

- **DURING SUMMER:** HVLS FANS destratify the air, creating a pleasant breeze effect and reducing the perceived temperature by up to 6 to 7 degrees.
- **DURING WINTER:** You can save up to 30% on energy costs by reducing heating expenses, as the fans move warm air downwards.

BENEFITS:

- *Drastically reduce the proliferation of viruses, bacteria and mould*
- *Prevent the deterioration of materials and machinery*
- *Increase operator productivity thanks to improved comfort in the working environment*
- *Extremely low consumption (ex. In winter equal to a **LED** bulb*
- *Connected via the internet*
- *Can be installed progressively*
- *Guaranteed motor: 50.000 hours + Inverter guaranteed for several years*

HOW IT WORKS

Air distribution of an EVEL fan

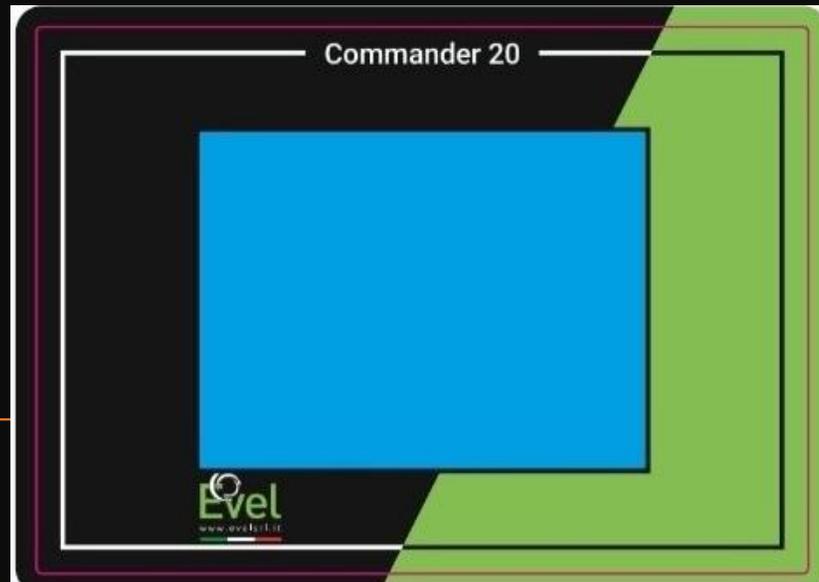

*By rotating slowly at low rpm (revolutions per minute), our fans create an airflow that, depending on the layout it encounters, can reach up to four times the fan diameter in all directions. **The generated airflow is gentle** and does not disturb people, ensuring optimal comfort and performance. By adjusting the rotation speed, you can cool spaces in summer and destratify air in winter, pushing warm air downwards..*

CONTROL UNITS

Evel DRIVE:

- On/Off button
- Max/Min rotation range adjustment
- Controls one fan line
- Supports up to 20 fans

CUSTOMER TESTIMONIALS

PROGRAMMA AUTO

One of EVEL's first customers, Mr. Zambelli, immediately recognised the potential of our HVLS fans and installed them at his car dealership in Piacenza.

WHAT IS IT?

The new portable fan. High performance at low cost

CONFIGURATION: 3 blades

ADVANTAGES:

- *Smarter*
- *Easy to install*
- *Available for rental*
- *Single-phase or three-phase*
- *More cost-effective*
